# Base fasting

## Small sacrifice – huge impact

The magnificent natural landscape outside our door, the therapeutic Gastein thermal water and the multifaceted health concept right at the hotel combine to create an effective recipe:

### BASE FASTING

Experience enjoyable moments for all your senses

- Our specially trained kitchen team will surprise you with unique creations of alkaline-based cuisine
- You will experience unimagined taste explosions
- Introduction to a healthier lifestyle
- More energy from the improvement of metabolism
- Vegan, lactose-free and gluten-free – suited for everyone
- Detoxifying and deacidifying – the immune system will be strengthened
- Improves skin texture & connective tissue

## Base fasting

Base fasting primarily serves to improve the human health. It comes down to elimination – with base fasting, all acid producers in food are eliminated during your fasting time in our hotel. So it is very important to drink 2 to 3 liters per day: water or watered-down herbal tea. You will notice that during the fasting week you won't go hungry, you will actually feel great and you will even learn some new, tasty recipes.

Many problems that you may experience after meals such as bloating, acid reflux or gas might suddenly disappear and your digestion will improve! Base fasting is basically suited for everyone and based on experience, leads to increased physical as well as mental vitality.

This fasting treatment is completely free of animal protein and grain and is thus especially beneficial for allergy sufferers. With our approach we have achieved excellent results with all chronic illnesses, that don't generally respond well to pure fasting therapy. These illnesses include rheumatism, fibromyalgia, asthma, cardiac diseases, hypertension, ulcerative colitis, Crohn's disease, forms of neurodermatitis, etc.

The cosmetic benefit is also significant. After only 1 week, skin is distinctly clearer and firmer, connective tissue is stronger and the eyes are clearer. Base fasting is a reset for the taste organs dulled by today's food industry. After 1 week of treatment, the transition to alkaline-rich and nutrition-rich whole foods will be easy. This is the goal of base fasting.
